

COOL SEASON LAWN CARE CALENDAR

AUGUST 2019

AUGUST

Bring in a sample of soil for a pH test. Make necessary adjustments by incorporating MAG-I-CAL.

If your lawn is beyond repair, or if you decide to replace your entire lawn, apply Killzall to kill existing vegetation.

SEPT. 1–OCT. 15

Remove dead vegetation.

Top dress soil with 1/4 - 1/2 inch of McGill Compost.

Seed with McDonald Tall Fescue Mix or McDonald Shady Lawn Mix.

Add Fertilome New Lawn Starter.

Apply Fertilome Humic Acid.

Water daily until grass appears (10-21 days), then cut back slowly until you are following a twice per week watering schedule.

Mow grass to 3 inches during the cooler months.

OCT. 15–31

Fertilize established lawn with Lawn Food Plus Iron or Organic Lawn Fertilizer.

After three mowings, eliminate weeds by applying Ferti-lome Weed Free Zone.

NOVEMBER

Apply Lawn Food Plus Iron, or Organic Lawn Fertilizer to feed your lawn throughout winter and early spring.

FEB. 15–MAR. 31

Apply Hi-Yield Turf & Ornamental Weed & Grass Stopper Containing Dimension or Organic Weed Control to prevent cool season weeds and crabgrass.

APRIL–MAY

Apply second application of Hi-Yield Turf and Ornamental Weed & Grass Stopper Containing Dimension or Organic Weed Control.

For post-emergent weed control, use Weed Free Zone.

Raise mowing height to 4 inches during summer months.

MAY–AUGUST

Use Weed Out with Crabgrass Killer to control both broadleaf and grassy weeds that may be present.

Water and mow.
